

# Automatic Table Top Blister/Tray Sealer B6X9

**Fast**  
**Powerful**  
**Affordable**

## Standard Features:

Balanced Heating Platen  
Self Aligning Pressure System  
Powder Coated Industrial Finish  
Fully Enclosed Sealing Chamber  
Low Cost Tooling

1800 Lbs. Sealing Force  
All Steel Construction  
Adjustable Pressure Regulator  
Electronic Timing System  
Industrial Quality

Stainless Steel Sealing Face  
Pressure Gauge  
Fully Adjustable Thermostat  
Low Power Consumption  
Fast Cycle Times

PRO PACK is a Registered Trademark of HANNAN Products Corp.

The PRO PACK® B6X9 has been engineered for reliability, high productivity and efficient use of space and energy. This industrial quality machine has everything needed to produce high quality packages at the fastest possible rate. The PRO PACK® B6X9 is ideally suited for long or short run production. The balanced heat platen, automatic operation and self-aligning pressure systems assure the proper sealing of materials every time. Hannan equipment is designed to withstand rugged continuous production use with a minimum of maintenance and operator skill. From the all steel construction to the heavy-duty industrial finish, the PRO PACK® B6X9 is "The Professional's Choice".

**Examples Of Outstanding Standard Features Include**

1. Fully enclosed sealing chamber (Safe Operation).
2. Instant fixture change over (True Drop-In Tooling).
3. Stationary heat platen.

**Packaging Made Easy / Packaging Made in America**

**SPECIFICATIONS:**

Sealing Area \_\_\_\_\_ 6" x 9"  
 Maximum Card Size \_\_\_\_\_ 7 1/2" x 10 1/2"  
 Maximum Blister/Tray Depth \_\_\_\_\_ 1 1/2"  
 Available Sealing Force \_\_\_\_\_ 1800 Lbs. @ 100 PSI  
 Temperature Control \_\_\_\_\_ Ambient To 570°F  
 Electrical \_\_\_\_\_ 110 VAC/6.5 A/1 PH/60 HZ  
 Minimum Air Requirement \_\_\_\_\_ 2.5 CFM @ 90 PSI  
 Shipping Weight \_\_\_\_\_ 97 LBS.

**OPERATING SEQUENCE:**

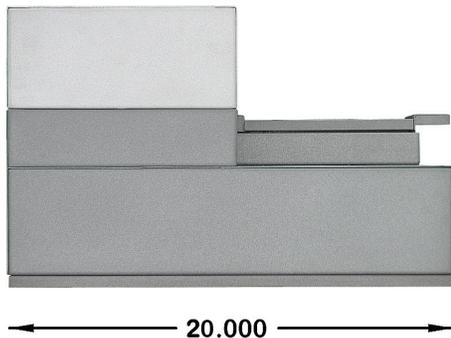

- 1 - Load blister, package contents and card (Face Down) into sealing fixture.
- 2 - Slide fixture shuttle completely into sealing chamber.
- 3 - Automatic heat and pressure cycle seals blister to card.
- 4 - Slide fixture shuttle out of the sealing chamber.
- 5 - Remove finished package and reload for next cycle.
